[Responsive Web Design - Free Code Camp](#)

PROJECTS

1) E-COMMERCE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Tailwind CSS | Firebase

- I added Firebase Authentication to my project so that only authenticated users can access the page.
- React Roters, useState, useEffect & useContext Hooks are used.
- Users can add items to their shopping cart and view the total cost of their order.

2) BLOG WEBSITE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Bootstrap & SASS | Firebase

- I implemented state management using useState, and useEffect. Firebase authentication database, and storage into the app for saving user details and blogs.
- I stored all the Blogs in Firebase database, so users can continue to view and edit or delete their blog. one of the features I added for users to like and comment on blog posts.

3) FOOD DELIVERY WEBSITE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Tailwind CSS | Firebase

- I implemented state management using useContext, useReducer, useState, and useEffect. I also integrated Firebase authentication, database, and storage into the app.
- I allowed the admin to add new food items and categorize them accordingly.
